YOU ASKED: WHAT WILL THE PATHWAY LIGHTS BE LIKE AT ROBRON PARK?

The new lights for the pathways at Robron Park will stand four metres high, shorter than parking lot lights (six metres).

The lighting is designed to focus light directly down on the ground, rather than shining up and out.

We understand that people want to enjoy their home with minimal night lighting, noise and traffic – even when living near a park or sports facility.

This lighting plan is being installed to meet the needs of park users while minimizing the impact on neighbours living near the park.

Both sport and site lighting were included in the original upgrade plan for Robron Park. The plan was developed between 2008

and 2010 by a steering committee that consulted with nearby residents and sports enthusiasts in 2009 and 2010. Feedback from that consultation was incorporated into the Robron Park Implementation Plan that was finalized and endorsed by City Council.

The new sports field lighting will only be on when the field is in use. Sports field lighting is intended to extend the all-weather field use during the darker days of the year, making the most of this important community investment.

The lighting in the parking lots and along the pathways will be on at night, with the light illuminating only the ground below.

These lighting upgrades will have the double benefit of increasing public safety and deterring vandalism.

The current phase of Robron Park development is entirely funded by the Community Works Fund (through the Federal Gas Tax) and previously accumulated City Parks Parcel Tax funding.

The project is scheduled to be complete by the end of November, so the construction activity currently underway Monday to Saturday from approximately 7 a.m. to 5 p.m. is temporary.
