

Hwy 28 Service Main Renewal

September 2015

2300 block of Highway 28 (Campbell River Road) between Quinsam and Doyle Roads

On Time and Under Budget!

Project Overview

Work under this project consisted of installing seven (7) new water service connections on Highway 28. The existing services were connected to an old undersized watermain which had reached end of service life. The new water services were connected across the highway to the existing distribution system.

The work was completed under a design-bid-built model. Design was completed by the City's Capital Works and Water Departments with construction Tender No.15-28 being awarded to Five Star Aggregate & Excavating Ltd.

Construction was complete the end of September 2015.

Funding for the Project

Budget was approved in the 2015 Capital Plan and was funded by water utility fees. The project was delivered on time with a final cost of \$78,471.40 against an approved budget of \$100,000.
