

# SEWERMAIN REHABILITATION PROJECT

## SUMMER 2016

*On Time and Under Budget!*

### Project Overview

Work under this contract consisted of the rehabilitation of approximately 1200 lineal meters of existing sanitary sewer mains through the use of Cured In Place Pipe (CIPP) lining method. The work was delivered in 12 distinct segments defined by man-hole to man-hole sections of relevant sewer main pipe.

The locations covered by this work were McCarthy Street lane, between 2nd & 3rd Avenues, McLean Street lane, between 1st & 2nd Avenues, 100 block of Thulin Street, 600 block Thulin Street, Thulin lane, between 3rd and 4th Avenues; 500 block Colwyn Street and lane, between 6th & 7th Avenues, Birch Street lane, between 6th & 9th Avenues, 10th Avenue (Elm to Fir Streets) and Fredrick Crescent. Neighbourhoods bordered by 1st Avenue to the south, 10th Avenue to the north, Cedar/Fir Streets to the west and Hwy 19A to the east.

The work was completed under a design-bid-build model. Design was completed by the City's Capital Works and Sewer Departments, and construction completed by Insituform Technologies Ltd.

### Funding for the Project

The project was funded through the Sewer Capital Reserve as per the approved 2016 Capital Plan. The final total cost of design and construction works associated was \$275k which was delivered under the approved budget and ahead of schedule.
