

Hilchey Rd Watermain Renewal Phase 2

May 27, 2022

Project Update Notice– Paving

We're almost done....Mother nature has finally started to cooperate and allow some much needed weather dependent work to be completed. Concrete repairs and deficiencies have been completed. Landscaping restoration is underway.

What's next:

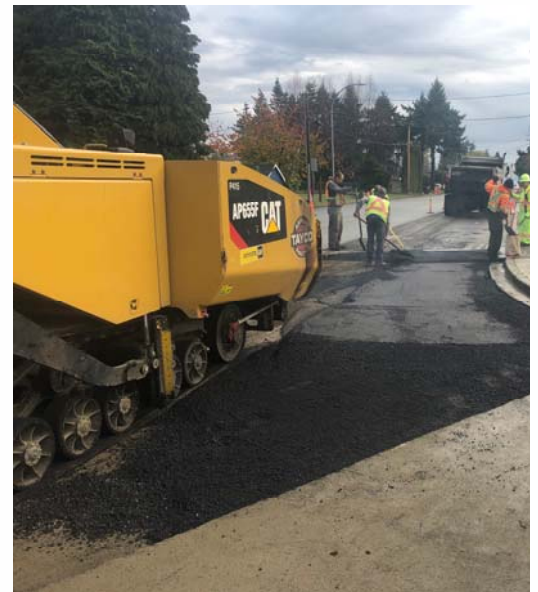

Asphalt Paving will commence on Tuesday May 31st till Thursday June 2nd. Work is expected to start at 7:00am till 5:30pm each day. This work is subject to delays from precipitation.

PARKING:

If you park your vehicle on Hilchey Road, we ask that you please move your vehicle during the dates and times above so the crews can complete the paving. We would prefer not to have to tow your vehicle.

What to Expect:

Asphalt Paving will take place along the eastbound lane and will limit traffic and driveways access at times. Buses and two-way traffic will be maintained along Hilchey on the north side of the roadway with single-lane alternating at times. Please use alternate routes where possible and follow the direction of the traffic control personnel.

What's left to do?:

We are still awaiting a response from the Province for permits related to the work that is pending from Dalton to the Highway and will advise those affected once this infrastructure renewal work may commence.
