

# The Construction Contract Has Been Awarded to Wacor Holdings Ltd.

## Getting Ready for Construction

The Contractor, Wacor, will begin work starting Monday, June 21st and be completed by October 2021. As mentioned in the previous newsletter, the work is generally limited to the road right-of-way and will see the new watermain installed under the roadway. The new water services will be connected to the existing services at or near the property line. The project team will contact you in advance of the water connection work if it is determined that your property will have any impacts due to accessibility of your existing water service.

## Traffic Impacts

This project will require single lane alternating traffic through the active work area. The contractor is required to maintain traffic control throughout the course of construction. For everyone's safety, all drivers and pedestrians should obey the traffic control personnel and signage.

## Parking Impacts

Street parking will be restricted during construction to ensure work can progress without obstruction. Please avoid parking in the construction zone where identified by temporary signage and notices by our contractor.

## Construction Impacts

The contractors activities will generally be performed between **7:00 AM to 5:00 PM, Monday - Friday**. Some activities may require longer shifts or on weekends. Temporary driveway closures and water interruptions should be expected.

We appreciate your cooperation and patience in following these restrictions. **The contractor will notify you in advance of any disruptions.**
