Safer traffic flow coming to Dogwood-Hilchey intersection thanks to new left turn arrow

A new left turn arrow for southbound traffic at the Dogwood Street-Hilchey Road intersection will improve safety by adding dedicated turning time for traffic going in this direction.

The City is adding a left turn arrow for traffic travelling south at this intersection near Timberline Village due to the amount of left-turning traffic at this location.

“Adding a left turn arrow provides a specific time for these turns, a much safer way for traffic to travel in that direction,” says Drew Hadfield, the City’s director of operations. *“This work is being done following a traffic review that confirmed the frequency of left turns at this intersection.”*

Construction is expected to take place on Wednesday, Nov. 20 from 7:30 a.m until 5:30 p.m. There may be minor traffic delays around the intersection during the day’s construction. Traffic control personnel will be on site as necessary to direct vehicles. Please obey all signs and watch for workers on or near the roadway.

“People should expect minor traffic delays at this intersection during construction,” Hadfield adds. *“Drivers are reminded to proceed with caution in the work area, and we thank everyone in advance for their patience during this construction.”*

Once the left turn arrow is installed, southbound drivers will see a signal indicating the time to make a left turn.

Raylec Power LP will install the left turn arrow. Total cost of the project is \$4,600, with ICBC providing \$3,100.
